

## Touchless Security Screening

# Evolv Express®

The days of invasive weapons screening are over.

The days of invasive weapons screening are over. Screening procedures that rely on metal detectors, hand wands, and invasive bag checks are slow and manual, resulting in uncomfortable, and unsafe, crowding.

## Introducing the Evolv Express®

### AI differentiates personal items from threats.

Unlike traditional metal detectors, Evolv Express uses advanced sensor technology and artificial intelligence to screen guests while they walk through at a natural pace—without stopping and without handing over their belongings. Express offers a dual lane, free-flow system proven to operate up to ten times faster than traditional metal detectors, alerting operators to the presence of weapons while ignoring harmless personal items like cell phones, keys, and coins.

### See potential threats for faster issue resolution.

When a potential threat is detected by the system, real-time image aided alarms show guards where the potential threat is located on a person or in his or her bag. This greatly reduces the amount of physical contact required and allows guards to act quickly and efficiently.

### Prioritize the guest experience.

Families and groups can enter your venue together without long lines and without invasive checks. It's a welcoming experience that maintains dignity and accelerates entry for your guests and employees while keeping venues and facilities safe from threats.

### Advance a proactive security posture.

With Evolv Insights™, the accompanying web-based and mobile-enabled analytics application, Evolv Express can account for its own performance, supporting post-event analysis and future operational planning. View visitor arrival curves and alarm rates by entrance, time, and date to understand where and when the flow of people—and threat objects—peak. Staff entrances accordingly for a proactive approach to security and operations.

## Only Evolv Express®

**Fast and Efficient:** Screen 4,000 people per hour, 10X faster than metal detectors.

**Easy to Operate:** See where the threat is located, reducing search time and fatigue.

**Flexible and Portable:** Ideal for indoor and outdoor use, easy to set up and move.

**Integration:** Communicate alerts to other security technologies across a venue.

**Analytics:** Support post-event analysis and a proactive security posture with the Web-based and Mobile-enabled app.

### Integrate with security technologies across your venue.

Easy-to-configure integrations with security technologies like VMS (video management systems) and Mass Notification Systems are built into Evolv Express, allowing critical notifications and alert images to be communicated to the extended security ecosystem throughout your venue. Teams at the SOC (Security Operations Center) can instantly receive verified threats, requests for assistance, and location information from Express, initiating security protocols and procedures when a weapon is identified at the system to better protect your guests and employees.

## Introducing the Evolv Express®

Evolv Express is the world's first and only touchless security screening solution that meets all of the post-pandemic security screening requirements. Express is proven to operate up to ten times faster than traditional metal detectors with its duallane, free-flow entrances and fusion of new sensor technology and artificial intelligence. The system is able to spot weapons while ignoring harmless personal items all while visitors simply walk through at a natural pace. Families and groups of people can now walk in together without long lines. It's a welcoming experience and allows them to make their way to the concessions or seats quicker.

## About Evolv Technology

Founded in 2013, Evolv Technology is the leader in human security solving the security screening problems of today with the most innovative technology and thinking. Evolv makes it possible for venues of all kinds to keep visitors and employees safe from concealed weapons, pandemic health threats and intruders. The company's Evolv Express has earned industry accolades that include the 2021 Artificial Intelligence Product Excellence Award, 2020 Edison Awards™, 2020 Campus Safety BEST Award and two Secure Campus 2020 Awards.

Evolv Technology has screened more than 200 million people, second only to the Department of Homeland Security's Transportation Security Administration (TSA) in the United States, and its technology combines powerful, advanced sensors with proven artificial intelligence (AI), security ecosystem integrations, and comprehensive venue analytics to reliably detect threats 10 times faster than traditional metal detectors.

“We knew our former security screening process would provide challenges in the pandemic environment,” said Jason White, managing director of corporate safety and security at Hershey Entertainment and Resorts. “We’d already been evaluating how we could improve on our guest screening process and had piloted Evolv Express last fall because the system could accommodate thousands of people an hour in a frictionless, nostonp flow. As we began formulating the security screening aspect of our pandemic reopening strategy, it was clear that Evolv Express was the best solution that could meet our requirements. Our guests and security staff have been pleasantly surprised at the speed of the touchless screening experience that largely eliminates manual bag checks. The responsive customer support and working relationship we have with the Evolv team is just as phenomenal as their product.”
